Craig,

For confirmation purposes, can you please shoot me a quick email to verify that the following stockpiles are approved to stay onsite and use for backfill?

(Note: All stockpiles are associated with a sample beginning NLF-SS-PHASE1 and end with the date collected, 050418)

SP201
SP202
SP205
SP214
SP215
SP218
SP220
SP221
SP222
SP223

Thanks,
Patrick

Patrick,

The following piles need to go off-site for disposal:

3, 4, 6, 7, 8, 9, 10, 11, 12, 13, 16, 17, 19, and 24.

Piles not listed can remain on-site as backfill.

All,

Attached is the lab data and my "hits" spreadsheet from the phase 1 stockpiles.....

Please advise on which stock piles need to be removed from the site, and which stockpiles can stay.

Thanks

Subject: RE: Phase 2A Stockpile Data

Eric,

Attached is the Phase 1 stockpile data. Please note the sample ID that includes "SP225" is a duplicate sample. The other 24 samples are from stockpiles labeled 201-224. Please let me know EPA's position on the future location of these soils (on or off site). If possible, a determination by/on Monday (the 14th) would be ideal as we have completed moving all other impacted stockpiles offsite and are planning on having the end dump back onsite on Tuesday to deal with the remaining impacted soils, assuming we have EPA's position.

Thanks and have a great weekend!

Patrick
